ABOUT ME

Full Stack Developer specialized in the Next.js, TypeScript, PostgreSQL, Tailwind CSS, and shadcn/ui ecosystem. I build fast, maintainable products, optimize performance, and ensure reliable releases through testing and CI/CD.

EXPERIENCE

Orexe

Lima, Perú (Remote) · Full-time

Full Stack Developer

Sep 2025 – Present

- I develop and maintain web applications using Next.js, TypeScript, Tailwind CSS, Angular, and shadcn/ui, building reusable and scalable UI components.
- I led the development of an internal platform, Atlas, a multi-tenant B2B operations portal designed to deliver DevOps/SecOps/Observability capacity as a subscription service. The platform enables backlog execution through atomic tasks, role-based workflows, and operational visibility.
- Atlas was built using React + Vite, React Query, TypeScript, Tailwind CSS, Hono (Node.js) for the backend, and PostgreSQL with Drizzle ORM for data management. Authentication is handled with Better Auth (email/password, username and OAuth providers such as Google, Microsoft, GitHub, Slack, and Atlassian), and the platform integrates with tools like Jira, Linear, Microsoft Planner, and Slack.

RELEVANT PROJECTS

- **Music Data Explorer:** A Next.js (SSR) + React + TypeScript application that uses the Spotify API to analyze artists and songs. It generates visualizations with Recharts and dynamic fun facts created using AI (AI SDK with Gemini). The UI is built with Tailwind CSS and shadcn/ui, applying best practices in architecture and API handling.
- **University Projects:** Problem-solving development: Implementation of efficient solutions using the C and Python programming languages. Optimization of algorithms to address academic and practical challenges.

SKILLS

- **Languages:** HTML, CSS, JavaScript, TypeScript, Python,
- **Frameworks/Libraries:** React, Next.js, Node.js, Express, Tailwind CSS, Better Auth
- **Databases:** PostgreSQL, MongoDB, Drizzle ORM
- **Tools & Cloud:** Git, Jira, GitHub, Docker, AWS, Vercel, CI/CD, Cursor, Claude Code
